

# STUTI KUMARI

stutijaiswal986@gmail.com | +91 9472904001 | Greater Noida, UP

## PROFILE SUMMARY

Motivated 2nd Year BCA student at Galgotias University with a CGPA of 8.5, showcasing expertise in software development, full-stack web technologies, and data science. Seeking an internship to utilize technical skills, contribute to digital projects, and gain robust industry experience.

## EDUCATION

**Bachelor of Computer Applications (BCA) — Galgotias University** 2024 – 2027

2nd Year | Cumulative GPA: 8.5

**Class 12th (Science Stream) — R.L.S.Y College** 2024

Score: 80%

**Class 10th — Isma Public School** 2022

Score: 72%

## TECHNICAL SKILLS

|                               |                                                                       |
|-------------------------------|-----------------------------------------------------------------------|
| <b>Languages:</b>             | Python, Java, C++, C                                                  |
| <b>Web &amp; Mobile:</b>      | JavaScript, Node.js, HTML5, CSS3, Android Studio                      |
| <b>Databases &amp; Tools:</b> | DBMS, File-based Database Management                                  |
| <b>Competencies:</b>          | Software development, logic-based problem solving, team collaboration |

## PROJECTS

**House Price Prediction Web Application** 2026

- Built a responsive web application utilizing Python for the predictive backend engine.
- Integrated logical algorithms to analyze property datasets and forecast housing prices based on user inputs.
- Managed clean data rendering and smooth client-side interaction using HTML, CSS, and JavaScript.

**SoundPlayerApp (Mobile Application)** 2025 – 2026

- Developed a native audio streaming and playback application using Android Studio.
- Implemented clean UI components, basic audio state logic (play, pause, stop), and local file path rendering.
- Leveraged Java within Android Studio to ensure smooth background thread processing and local performance optimization.

**StackLens (Website Infrastructure Analyzer)** 2025

- Developed an interactive technical tool designed to analyze and visualize web infrastructure stacks via URL inputs.
- Detects core UI layout structures, active components (buttons, modals), and over 1,500 framework signatures.
- Generates clean code skeletons, setup commands, and detailed architectural performance insights.

**Institute of Digital Risk (IDR) Web Identity** 2025

- Designed a responsive brand identity and multi-section homepage (Hero, About, Services, Contact).
- Built using pure HTML, CSS, and vanilla JavaScript to highlight cybersecurity awareness and vulnerability tracking.
- Implemented a smooth-scrolling sticky navbar utilizing a professional orange, black, and white design scheme.

**File-Based Custom Database System**

2024 – 2025

- Built a custom database engine in C++ incorporating file I/O operations and persistent data storage.
- Implemented full CRUD functionalities handled through modular Object-Oriented Programming (OOP) principles.

**Sigil (AI-Based Risk Engine)**

2025

- Created an automated monitoring system utilizing an AI-based risk scoring framework scaled from 0 to 100.
- Features safe package quarantine handling, real-time installation tracking, and isolated script analysis.

**CERTIFICATIONS**

- **AWS Academy Graduate** – Machine Learning Foundations Training (2025)
- **Web Development Certification** – EduSkills (2024)

**LANGUAGES**

- **Hindi:** Native Proficiency
- **English:** Professional Working Proficiency
